

Examples by activity

You do not know how to fill in your record? The APDP offers a number of examples of processing activities (in French only) classified into different categories (the most common types of processing, processing carried out for surveillance purposes, processing by sector of activity, etc.)

This section should be expanded over the coming weeks. So do not hesitate to consult it regularly.

The most common data processing

- [Administrative management of employees](#)
- [Professional e-mail management](#)
- [Management of fixed and mobile telephony](#)
- [Management of customer and prospect files](#)
- [Management of supplier files](#)
- [Management of the company's showcase website](#)

Processing carried out for surveillance purposes

- [Video surveillance of premises](#)
- [Badge-based access control to premises](#)
- [Recording of telephone conversations for order traceability purposes](#)
- [Geolocation of vehicles made available to employees](#)

Processing by sector

- [Membership management for associations and federations of associations](#)
