

The main data breaches: obligations and advice on how to prevent them

Data breaches can take a variety of forms, including incorrectly addressed mail, data exfiltration by an employee, or the loss or theft of a device.

To help you determine what your obligations are in relation to some of the most commonly encountered breaches (notifying the Data Protection Authority, informing the affected individuals) and what organisational and technical measures can be put in place to prevent them from (re)occurring, you can download our factsheet [here](#).
